- Affinity

Education

Master in information technology (2016)

Summary

UX / UI Designer with 3.3 Years of experience in Information Technology and Consultancy firm. My aim is to create better interfaces and experiences for the user, making the web applications and technology easier for the user. Simplifying communication barriers by bridging the gap between end-users, designers and developers

Professional Experience
UX/UI Designer – PI TECHNIQUES PVT LTD, Mumbai
Nov 2017 - Present

- Actively working on multiple projects.
- Leading a design team to maintain the internal styles and implement new design patterns in the desktop and mobile application.
- Basic responsibility includes taking of requirements from the client. Later analyzing them according to user need. Grouping all the necessary information and then discussing with the team and creating scenarios related to the requirement and coming up with new ideas, making sketches of the ideas then discussing it with the developers. Later wireframing the idea and then representing it to the client.
- Closely work with the business analyst team, developers and designers to create user-friendly application.
- Developed landing pages, dashboards and application task flow using Axure software
- Collected, defined and translated user requirements into project designs and implementation plans
- Redesigning of existing Application to improve navigation, enhance visuals and user usability.
- Took concepts and produced design mockups and prototypes to strengthen designs, enhance user experiences and improve site interactions.

Projects:

Citizens app
- Designed a mobile application where you can share your thoughts about an incident (Example: Eve teasing, child abuse etc.) going around you and to bring awareness among the people by sharing this incident on a single platform, and helping the responsible authorities to take action against the incidents.

V.Group
Worked on designing a ship management application called shipsure for 3 years, where all the information you need to manage your vessel is at your fingertips. With shipsure you can manage crew, procurement, location Information, safety, reporting and fuel consumption, all in one convient platform.

Agriculture App
Designed a mobile application for Agricultural growth. More than 600

million Indians depend upon Agriculture for their livelihood. Considering the huge potential of the market, many companies have started investing in this sector by creating digital products (For Service) which would ease the process for the Agriculturists.
